## REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art U.S. Pat. No. 6,247,130 Fritsh Bernhard discloses a system/method that permits the purchase of audio music files over the Internet.

JP360253082A Mabe Kouhei discloses a music data file in which many melodies have been recorded in the form of music information which has encoded various sheet music symbols.

However, neither Fritsh Bernhard nor Mabe Kouhei singularly or in combination fails to anticipate or render obvious the recited feature:

As per claim 1 "an anti-piracy module to embed an ID tag in the decided music content; and an output device supplying the decoded music content to the user from the decoder; a central controller connected to the user stations and comprising a first input terminal receiving from a user station an indication of a user selection of a transmitted music content and a first output terminal transmitting to the user station a key unique to the selected music content; and a billing system associated with the central controller to bill the user stations, wherein the billing system processes payment transactions from the user stations and the central controller transmits the key only if a payment transaction for the key is completed in advance of the key transmission".
